Franklin Electric
FUELING SYSTEMS

EVO™ SERIES UPGRADE KITS

Leverage an existing EVO™ 550 or EVO™ 5000 and upgrade to the latest evolution in fuel system management. Get all the capabilities of the NEW EVO™ 600 or EVO™ 6000 on an existing EVO™ 550 or EVO™ 5000 with an easy-to-install Upgrade Kit.

NEW FEATURES

Get all of these new features with the Upgrade Kit

EVO™ Series Upgrade Kits include everything needed to transform the existing EVO 550™ or EVO™ 5000 to an EVO™ 600 or EVO™ 6000.

CORROSION CONTROL™

Compatibility with the Corrosion Control™ Water Separator and Corrosion Detection Sensor.

USER INTERFACE UPGRADES

Get additional One-Touch buttons to automate more common tasks, a shallower menu structure, and remote access on any device via FFS PRO® Connect.

LOWER RETROFIT COSTS

Compatibility with the Multiplexing Sensor Hub™ allows for additional device inputs into existing sumps without having to break concrete to run new Intrinsically Safe wires.

SECURITY FEATURES

Create unlimited user roles with customized access levels—all with individual user logins and tracking. The latest TLS/SSL protocols ensure data encryption between web browsers and the EVO™.

MULTIFACTOR AUTHENTICATION

Extra authentication ensures only authorized personnel can access and control EVO™, reducing the risk of tampering or data breaches.

MORE DEVICE INPUTS

Compatibility with the Universal Device Protocol Module allows for more inputs and system flexibility than ever before.

ORDERING INFORMATION

Model	Description
